

agromitiga

Magazines 'Tierra y Vida'

Action E1

Summary

One of the dissemination tools used by the LIFE Agromitiga project to reach several of the target audiences of the information (farmers, technicians, policy makers...), are the magazines that are periodically published by some of the associated beneficiaries.

Among the magazines, there is the one published by ASAJA Sevilla every two months. In each of them, a special section is reserved for the LIFE project, in which the progress and results obtained to date are reported.

On this occasion, the issues published in 2019 (numbers 436 to 441) and the issue published in 2020 (numbers 442 and 443) are attached.
